

Professional Graphic Design

About The Course

The main purpose here is to make you able to use the graphic design tools and techniques in a professional way. Graphic Design helps to build the brand identity of a company. Thus, it needs to be conceptual and unique to represent a company, brand or any kind of products or services. The module is designed to cover all aspects of Graphic Design and it is mostly helpful for a fresher who can start afresh. To know more about the module, take a look in the highlights of the module and get insights of how we are conducting the course.

Career Opportunity

The career opportunity in graphic design is demanding all over the world. Two great opportunities in graphic design are freelancing and outsourcing. With the passing time, foreign countries are in need of more and more freelancers and

outsourcers. They are looking for designers in the third world countries and according to the statistics, Bangladesh is in the third position. Graphic designers can explore their career in the different areas representing different titles. Such as-

Graphics Designer

Creative Director

Creative Executive

Brand Promoter

PhotoShop Artist

Logo Designer

UI Designer And Related Occupations.

A perfect blend of varieties of skills will definitely lead your path towards success. For starting your own outsourcing business, to freelance jobs or to work in local marketplaces, all the opportunities are there for you. The best the design the better your career path will be. Graphic design is leaving its remarks all over country.

Digital Marketing

About The Course

Microsoft Windows Server 2016

About The Course

The MCSA (Microsoft Certified Solutions Associate) certification is a globally-recognized way to validate and promote your professional-level IT knowledge, competence, and ability. Windows Server 2016 Course is an intermediate level certification that enables candidates to monitor and manage Windows Server 2016 operating system and other related activities. This course is the first step towards your path to becoming a Microsoft Certified Solutions Expert.

Course Module 70-740

Module 1: Installing, Upgrading, And Migrating Servers And Workloads

Module 2: Configuring Local Storage.

Module 3: Implementing Enterprise Storage Solutions.

Module 4: Implementing Storage Spaces And Data Duplications.

Module 5: Installing And Configuring Hyper-V And Virtual Machines.

Module 6: Deploying And Managing Windows Server And Hyper-V Containers.

Module 7: Overview Of High Availability And Disaster.

Module 8: Implementing And Managing Failover Clustering.

Module 9: Implementing Failover Clustering For Hyper-V Virtual Machines.

Course Module 70-741

Module 1: Planning And Implementing An IPV4 Network

Module 2: Implementing DHCP

Module 3: Implementing IPV6

Module 4: Implementing DNS

Module 5: Implementing And Managing IPAM

Module 6: Remote Access In Windows Server 2016

Module 7: Implementing Direct Access

Module 8: Implementing VPNs

Module 9: Implementing NETWORKING FOR Branch Offices

Module 10: Configuring Advanced Network Features

Module 11: Implementing Software-Defined Networking

Course Module 70-742

Module 1: Installing And Configuring Domain Controllers

Module 2: Managing Objects In AD DS

Module 3: Advanced AD DS Infrastructure Management

Module 4: Implementing And Administrating AD DS Sites And Replication

Module 5: Implementing Group Policy

Module 6: Managing User Settings With Group Policy

Module 7: Securing Active Directory Domain Services

Module 8: Deploying And Managing ADDS

Module 9: Deploying And Managing Certificates

Module 10: Implementing And Adminstrating AD FS

Module 11: Implementing And Adminstrating AD RMS

Module 12: Monitoring, Managing And Recovering AD DS

ISP Setup And Administration Using MikroTik (MTCNA, MTCRE)

About The Course

This training course will provide you with the skills to configure a MikroTik RouterOS Router board as a dedicated router, a bandwidth manager, a secure firewall appliance, a simple wireless access point, a VPN Server or Client or an Internet Hotspot concentrator etc. It is a course that covers the basics for those that

new to MikroTik Router OS (or is struggling to understand it!) and concentrates on the basics of setting up a MikroTik device. .

Course Module

IP Addressing

Subnetting

After Successfully Completing The Course Attendees Will Be Able To Installing And Upgrading The RouterOS

First Login To The RouterOS Using RouterBOARD

Creating A Simple Network

Static IP Addressing And Routing

Basic Dynamic Routing Using OSPF

Creating A DHCP Server And Client

Firewall Filters And NAT Rules

Various VPN Tunnel Types

Simple Queues For Bandwidth Control

Hotspot Configuration

Wireless Networks

Web Proxy For URL Filtering Control And Caching And The Dude.

Professional Web Development

About The Course

Web Development consists of two segments: front end development and backend development. Front-end Developers work with visual designs of a website and build the sites using code. The front end developer builds the structure of a website using HTML, then change the layout using CSS and sometimes uses javascript too. Besides Backend developers work with more advanced issues. They work with API (Application Programming Interfaces), CGI programs and sometimes script like PHP. Websites functionality is their main concern.

Course Module

Cyber Security

About The Course

When the word ‘hacker’ enters into our ears, we may get scared! But don’t worry. Not all hackers are dangerous. If you have a knack for security loopholes and possible server threats, you are already familiar with the term “Ethical Hacker”. It’s a system where a company appoints hackers who try to find out the possible security threats and then remove and ensuring the companies security and also protect from outside attackers. Large companies having big servers with massive collection of data are constantly looking for such ethical hackers to make them unexploited.

The Cyber Security course will significantly benefit you directing the progressive concepts on Ethical hacking such as corporate intelligence, Vulnerability assessment, penetration testing, exploit writing, reverse engineering.

Who Can Join:

Security officers, auditors, security professionals, site administrators, anyone who is concerned about the integrity of the network infrastructure and individuals who have highly pensionate about hacking.

Android App Development

About The Course

With the world going mobile, the importance of apps is increasing day by day. App development hence refers to the creation of applications to be used on mobile devices. Today when we buy a smartphone or a tablet, we can see that it comes with some pre-installed apps for social media or searching or such other purposes. And if we can't find what we are looking for, we just log on to the app store and download the things we need. The more people buying smartphones, the more the necessity of workable apps. It proves that learning app development is a pretty good career choice today. Start learning from the best in the industry and be your own boss.

Responsive Web Design

About The Course

Web design means creating websites with a user-friendly structure and with an aesthetic approach. A web designers always think about the layout, color scheme and unique design of a website. But their task does not just end there. They also work hard to create a user-friendly navigation system. They also need to rank their websites and for that, they need to do some SEO tasks too. In short Web Designer can be denoted as a front-end designer or an experienced designer. A web designer needs to design such interface that will be comfortable, attractive and friendly to the visitors. But it also needs to be responsive that user can use it in different devices as per their choices. In IT Bangladesh Institute, we will delegate our students with the modern and the most up-to-date techniques that will bring out their talents to be successful web designers.

3D Animation

About The Course

The process of generating three dimensional moving images in a digital environment is called 3D animation. Mainly it has three sections –

1. Modeling
2. Layout and animation
3. Rendering

Modeling is generating 3D objects in a certain scene. The next phase is done by positioning and animating. And the last phase, rendering, is the output of the completed result. The techniques used in 3D Animation involves appearance sketching, appearance modeling, arena building, camera setup, texturing, alteration, bonding, and rendering. Cinema 4D, Autodesk MAYA & Autodesk 3ds

Max are the names of some of the best 3D animation software. At IT Bangladesh, we highly focus on Autodesk MAYA and teach our students to be the best in the industry.

Our Overview

[Home](#) [About](#)

IT Bangladesh is an institution where empowering the community for an excellent standard of learning is what we desire. We endeavor for the continuous improvement of our leaders who will work for constructing a better future. We will continue to share our knowledge for contributing to the success of individuals and to serve society with the best interest.

We are committed to providing our students with a platform where superiority is the mantra. We nurture the young talent by sharing knowledge, providing supports in learning techniques, co-operating them for international standard projects, making successful freelancers and driving our youth towards a world of entrepreneurship and thus reducing inequalities. Our culture is important to us and our team of experts drives our culture. The skilled human resource make our deliverables valuable that really helps us to set our standard internationally.

In this fast-paced digital world, achieving in career and reaching in targeted goal is depending on the proper execution of planning, implementing and sustaining changes. So getting there with an institution like us will be your wise choice. Your great experience of learning influences our way of training and thus we serve our students and engage with our commitments. Here we invite you to come and join us to have a change in the result of your life and thus we would be grateful to know you and to strengthen a long-lasting relationship.

Mission

- To empower the community by ensuring state of the art method which strengthens the belief in quality learning.
- To raise opportunities and growth by broadening the areas and possibilities for our future leaders.
- To connect best selected human resource for delivering standard values that supports leaders to flourish.
- To utilize the power of youth by serving and meeting the emerging needs both in local and global network.
- To reduce inequalities for the best interest of the society by creating international array of excellence.

Vision

To become a premier institute recognized for its diversity, and known for its excellence in knowledge sharing.
